Shoulder belt is only suitable for some children. Belt fastener, belt lock can easily hurt the neck of the children, so it should be avoided to fasten the belt close to children's necks.

One kid

1. Untie the shoulder belt from the HSB handle on the seat.  
2. Place the kid in the middle of the seat.  
3. The safety belt in the middle fastened around going through the legs of the kid.  
4. Buckle the horizontal belt going across body of the kid.

Two kids

1. Untie the shoulder belt from the HSB handle on the seat.  
2. Place the kids in the middle of the seat.  
3. The safety belt in the middle fastened around going through the legs of the kid.  
4. Buckle the horizontal belt going across body of the kid.

3

1. Untie the shoulder belt from the HSB handle on the seat.  
2. Place the kids in the middle of the seat.  
3. The safety belt in the middle fastened around going through the legs of the kid.  
4. Buckle the horizontal belt going across body of the kid.

5. Untie the shoulder belt from the HSB handle on the seat.  
6. Place the kids in the middle of the seat.  
7. The safety belt in the middle fastened around going through the legs of the kid.  
8. Buckle the horizontal belt going across body of the kid.

8

1. Untie the shoulder belt from the HSB handle on the seat.  
2. Place the kids in the middle of the seat.  
3. The safety belt in the middle fastened around going through the legs of the kid.  
4. Buckle the horizontal belt going across body of the kid.

5. Untie the shoulder belt from the HSB handle on the seat.  
6. Place the kids in the middle of the seat.  
7. The safety belt in the middle fastened around going through the legs of the kid.  
8. Buckle the horizontal belt going across body of the kid.

9

1. Untie the shoulder belt from the HSB handle on the seat.  
2. Place the kids in the middle of the seat.  
3. The safety belt in the middle fastened around going through the legs of the kid.  
4. Buckle the horizontal belt going across body of the kid.

5. Untie the shoulder belt from the HSB handle on the seat.  
6. Place the kids in the middle of the seat.  
7. The safety belt in the middle fastened around going through the legs of the kid.  
8. Buckle the horizontal belt going across body of the kid.
